

SteelEye® Technology, Inc.

Why SteelEye?

SteelEye Technology delivers continuous data protection and business continuity software to SMB and enterprise customers worldwide. Customers adopt SteelEye for its field-proven solutions to assure the availability of business critical applications and data on Windows and Linux operating systems in any combination of physical, virtual, on- and off-premise environments.

Business continuity has become a global concern of C-level management and IT organisations. SteelEye delivers robust, fault-resilient protection of critical IT resources to satisfy these concerns while providing disaster recovery capabilities.

SteelEye collaborates with key infrastructure providers to deliver on the expectations of the market for maintaining productivity during periods of planned and unplanned downtime.

With SteelEye you can count on:

- A flexible and simple-to-use product suite encompassing all major platforms and applications
- Core competency in delivering business continuity solutions
- Over 25,000 installations of application and data protection, worldwide
- A global network of partners and resellers for local support and professional services

SteelEye Solutions

Products are a means to an end. Solutions are the keystone for deploying and sustaining IT infrastructure that offers persistent access by corporate users and customers. SteelEye is the first choice for companies seeking powerful, scalable, adaptable solutions that can be deployed successfully in a timely and cost-effective manner while meeting the deployment requirements of the organisation. SteelEye

solutions meet the need to provide absolute data protection, 'always on' IT services and to maintain access with zero interruption of service. SteelEye provides the most affordable and flexible approach to securing and protecting your business critical IT resources.

SteelEye delivers solutions that address the fundamental concerns facing IT organisations:

- SteelEye DataKeeper® and DataKeeper Cluster Edition are highly optimised business continuity solutions for Windows Server 2003 and 2008 R2
- LifeKeeper® for application assurance to sustain productivity by providing persistent access to business-critical information by users
- SteelEye Protection Suite for integrated solutions to guarantee maximum uptime and enable disaster recovery
- SteelEye Multi-site Cluster for Linux extends Linux clusters over wide area networks to facilitate Linux Disaster Recovery Solutions by combining SteelEye LifeKeeper for Linux and SteelEye Data Replication

Bottom Line

SteelEye delivers comprehensive management, migration and protection solutions for market leading mission critical applications and databases running on Linux or Microsoft Windows operating systems. In 2007, SteelEye added support for virtual environments including VMware and Microsoft Hyper-V. Our latest solutions include internationally recognised, award-winning SteelEye LifeKeeper high availability (HA) clustering and SteelEye DataKeeper for end-to-end LAN to WAN protection of on-premise or off-premise physical or virtual servers hosting key applications and data.

SteelEye®
TECHNOLOGY, INC.
www.steeleye.com

SteelEye's thought leadership through innovation includes:

- Data replication and recovery of Windows and Linux physical or virtual machines
- Support for clustering protection of Microsoft Hyper-V and VMware Virtual Center
- Disaster recovery and data replication support for Microsoft Windows Server Failover Clustering
- Adding a 3rd Disaster Recovery node to support Linux clusters
- HA clustering for DB2, SAP, Oracle, MySQL and EnterpriseDB on Linux
- HA clustering for SQL Server on Windows
- Single system GUI view of Windows & Linux servers

The image shows a graphic with the SteelEye logo and 'TECHNOLOGY INC' in the center. It is divided into five horizontal sections, each with a label on the left and logos of supported technologies on the right:

- Typical Applications:** Includes logos for IBM, Rational Software, SAP, Oracle, Informix, MySQL, Microsoft Exchange Server, and Microsoft SQL Server.
- HA/Data Replication:** Features the SteelEye logo and 'TECHNOLOGY INC'.
- Virtualization:** Includes logos for VMware and Windows Server 2008 Hyper-V.
- OS:** Includes logos for Novell, SUSE, Red Hat, and Windows Server 2008.
- Processor:** Includes logos for AMD Business Class and Intel.
